

# Why YOU want HUGO™

There's currently a lack of understanding when it comes to High-Intensity PEMFs, and exactly WHY it is so amazing. Let's for the moment set aside all the things that most people already know about, like the immediate and long lasting pain relief, or how it promotes healing and regeneration, and enhances circulation and oxygenation, or how it counter-acts the harmful electromagnetic radiation that we're constantly bombarded with by all the powerlines, cell-phones, microwaves, etc. on a daily basis. Wonderful as it is, let's just put all that aside for now.

**Pain or no pain, this is REALLY why you want to be doing this EVERY DAY:**

## ENERGY

Every cell in your body is electrical! Like a tiny little battery, each cell needs a measurable electrical charge to function optimally. In other words, every cell needs certain amounts of energy, and the energy requirements change depending on the demands of the body. For example, if you go for a run your muscle cells use up more energy than when you walk or sit.

Everything from thinking, to digesting food, to running requires energy! Your vital organs in particular need a lot of energy to function properly, especially your brain, liver, kidneys and gut. Weak, stressed or diseased cells are known to have low energy. Most people today, even seemingly healthy people, are under-performing at the cellular level. Lack of oxygen, toxicity, free radicals and poor nutrition are just a few things that can rob you of energy.

High-Intensity PEMFs bathe your cells in pure, raw energy by inducing a flood of electrons. In other words, it recharges your batteries! This helps your cells to function optimally and meet all their energy demands – and MORE.

# NUTRITION + DETOX

Only High-Intensity PEMF equipment, such as the HUGO™, can create the electric field necessary to effectively enhance the transportation of nutrients and waste products across the cell membrane.

So many people have to take vitamin and mineral supplements! With all the pollution, pesticides, GMO's and preservatives used in this day and age, it's hard for the body to get adequate nutrition from the foods you eat. Even when you supplement correctly, there are many micro-nutrients that have a low bio-availability.

Not only that, but it is impossible to avoid accumulating toxins, heavy metals and free radicals with the modern lifestyle.

High-Intensity PEMFs enhance cellular metabolism: it helps to detox cells and allow more nutrients into the cells. This is especially important for elimination organs such as the liver, kidneys, colon, and so on.

And unlike with Low-Intensity devices, High-Intensity PEMFs also provide a kind of physical application – you can actually *feel* something happening in your body! Your muscles contract with every pulse, and acupuncture points are stimulated. It's like getting an "organ massage". These muscle contractions also help to activate the lymphatic system and move lymph fluid around the body. With the HUGO™ there will be no doubt in your mind as to whether or not you are actually receiving the PEMFs.

## A MATTER OF TIME

Energy, Detox and better absorption of Nutrients. These are three things that EVERYONE wants, and HUGO™ High-Intensity PEMF can give you ALL THREE simultaneously, in just 3 - 12 minutes!

Not only that, HUGO™ is the world's first ever FULL-BODY, High-Intensity, PEMF device that utilizes not one, but TWO full-body PEMF mats to create a double-layer for an amplified "sandwich" effect. Most High-Intensity PEMF devices will focus on one specific target area at a time, e.g. knee, back, shoulder, etc. With the HUGO™ you can boost energy levels, optimize cellular metabolism, and strengthen circulation and oxygenation throughout your ENTIRE BODY in just 3 - 12 minutes!

Not only does HUGO™ help you to function optimally at the cellular level, but it also helps to enhance your performance and productivity so you can enjoy a higher quality of life.
